

GERSON TIONGSON

FULL STACK ENGINEER

PROFILE

Angular specialist with 5+ years of front-end experience and 7+ years of relevant work, now a certified Full Stack Engineer — building end-to-end applications with Angular, Java Spring Boot, Node.js, PostgreSQL, and MongoDB. Strong expertise in RxJS and NgRx for reactive, scalable architecture.

Proven track record delivering multiple regional go-live releases at enterprise scale (Samsung / Accenture), collaborating with distributed cross-functional teams, and maintaining clean, production-ready code.

WORK EXPERIENCE

Accenture Philippines

2023- PRESENT

Advanced App Engineering Analyst

Samsung (Client Project) — March 2024 - April 2026

- Delivered multiple regional go-live releases across 8+ countries, providing real-time production support and resolving critical issues during deployment windows
- Built reactive, scalable front-end solutions using Angular Signals, RxJS, and NgRx for a high-traffic global e-commerce platform
- Integrated payment gateway solutions and third-party APIs, managing complex asynchronous data flows with RxJS
- Developed dynamic email templates using VM-based files, improving transactional communication across regions
- Conducted Knowledge Transfer sessions and performed feature handover to support teams, reducing onboarding time
- Collaborated with distributed global teams — backend developers, QA, BAs, and Scrum Masters — to consistently deliver sprint goals on time
- Managed regional deployments and post-go-live support, ensuring zero-downtime stability across production environments
- Maintained technical documentation in Confluence and participated in Agile ceremonies

Internal Projects — Aug 2023 - March 2024 & April 2026 - Present

- Developed and maintained reusable Angular components for scalability
- Wrote and maintained unit tests using Jest to ensure code quality
- Participated in code reviews to enforce coding standards
- Collaborated in daily stand-ups and agile ceremonies with global teams

Grosvik Philippines

2021- 2023

Junior Frontend/Angular Developer

- Developed scalable and maintainable Angular applications, translating design concepts into responsive and reusable components while ensuring code quality and performance.
- Collaborated with team members using GitHub for version control, code reviews, and efficient project workflows, delivering user-friendly web interfaces.

Senior High School —

2019 - 2022

Computer Programming Instructor

- Taught programming fundamentals, computer systems, and applied computer science concepts to senior high school students
- Developed lesson plans and assessments covering core computing principles

Professional Highlights

- Full Stack Developer Certification — Accenture Song, June 2026
- JavaScript & Front-End Development — Upwork, August 2024
- Claude Code AI Trainer — Anthropic · Aligner Platform, 2026

Freelance Experience

- Built and design client websites, either hand-coded or using CMS platforms such as Wix, WordPress, Squarespace.

EDUCATION

2013 - 2019

PRESIDENT RAMON MAGSAYSAY STATE UNIVERSITY

former Ramon Magsaysay Technological
University (RMTU)

- BS Computer Engineering

SKILLS

- Angular & TypeScript
- Java, Spring Boot
- Node.js, Express.js
- JavaScript (ES6+)
- HTML5, CSS3, SCSS
- RxJS & NgRx
- PostgreSQL, MongoDB
- Docker
- RESTful APIs & OAuth2
- Unit Testing (Jest)
- Git & Version Control
- Agile / Scrum
- Jira & Confluence
- Figma, Adobe XD
- CMS Platforms (Wix, WordPress)

LANGUAGES

- English (Fluent)
- Filipino (Native)
